

The Fancy Color Diamond Rarity Tool[®]

Rarity Data

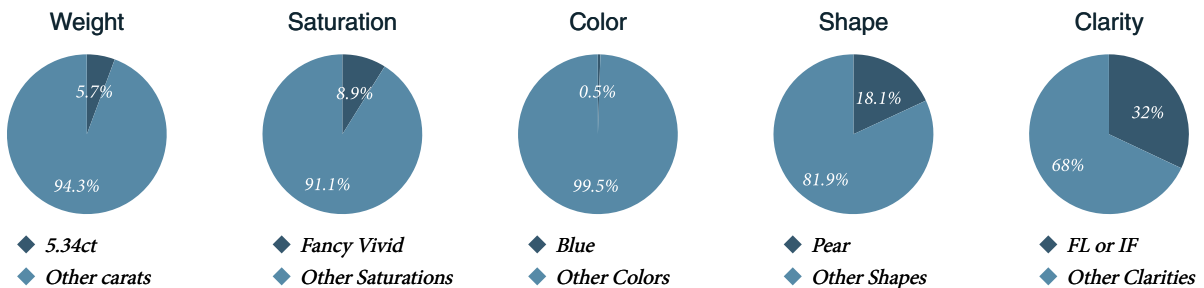

Diamond Characteristics

Color Blue
 Carat 5.34ct
 Shape Pear
 Saturation Fancy Vivid
 Clarity FL or IF

Market Prevalence:

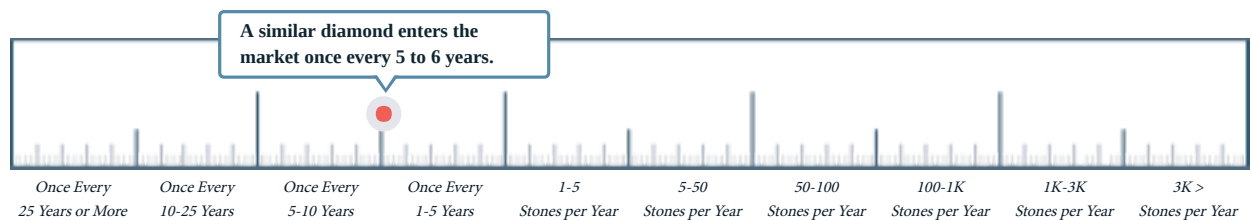

A similar diamond enters the market once every 5 to 6 years.

Blue Fancy Vivid Color Diamond Stats

The rarity report analyzes rarity out of approximately 60,000 stones that are submitted to the GIA every year.

Market Prevalence

General

Blue diamonds represent only 0.5% of all fancy color diamonds. When boron particles enter a diamond's crystal matrix, the result can be a stunning blue gem. The percentages of blue diamonds mined each year is truly negligible, with only a few stones unearthed annually. Only a fraction of a percent are Natural Fancy Color Diamonds. Among all diamonds submitted to grading labs, only 3% are Natural Fancy Color.
