

THE FCRF RARITY REPORT

DIAMOND CHARACTERISTICS

Carat: 10.01

Saturation: Fancy Intense

Color: Yellow

Shape: Cushion / Radiant

Clarity: VVS

APR 3rd 2023

Fancy Color Diamond appreciation revolves around beauty and rarity. The Rarity Report illustrates the market prevalence of a polished diamond. Whether a diamond is one of several hundred or is introduced to the market once a decade, rarity was, and always will be, a part of the epic story of a fancy color diamond.

Rarity Grade: Rare

A mere **5 to 10** similar fancy color diamonds enter the market yearly.

1 In 270,000

only **1 in ~270,000** diamonds will have similar characteristics.

GEMOLOGICAL CHARACTERISTICS

Market Distribution Percentage

The prominent yellow color of your natural 10.01 carat, Fancy Intense Yellow is attributed to a significant concentration of nitrogen atoms within its structure. These atoms absorb blue light, giving the diamond its distinct yellow hue. The intensity of the yellow color increases with the concentration of nitrogen in the diamond. Therefore, a higher concentration of nitrogen results in a more vibrant yellow appearance.
