

THE FCRF RARITY REPORT

DIAMOND CHARACTERISTICS

Carat: 3.07

Saturation: Fancy Light

Color: Orangy Pink

Shape: Pear

Clarity: SI1

APR 3rd 2023

Fancy Color Diamond appreciation revolves around beauty and rarity. The Rarity Report illustrates the market prevalence of a polished diamond. Whether a diamond is one of several hundred or is introduced to the market once a decade, rarity was, and always will be, a part of the epic story of a fancy color diamond.

Rarity Grade: Rare

A mere **1 to 2** similar fancy color diamonds enter the market yearly.

1 In 2,000,000

only **1 in ~2,000,000** diamonds will have similar characteristics.

GEMOLOGICAL CHARACTERISTICS

Market Distribution Percentage

When light hits a polished diamond, some of the light waves are absorbed by defects in the diamond's atomic structure. The color sensation of pink diamonds is created when light passes through a deformed atomic structure which absorbs the green light spectrum.
