Saturation: Fancy Intense

Color: Pink/Purple/Ish Pink

Shape: Pear

Clarity: FL Or IF

MAY 24th 2023

Report #FC1684919431362

Fancy Color Diamond appreciation revolves around beauty and rarity. The Rarity Report illustrates the market prevalence of a polished diamond. Whether a diamond is one of several hundred or is introduced to the market once a decade, rarity was, and always will be, a part of the epic story of a fancy color diamond.

## Rarity Grade: **Very Rare**

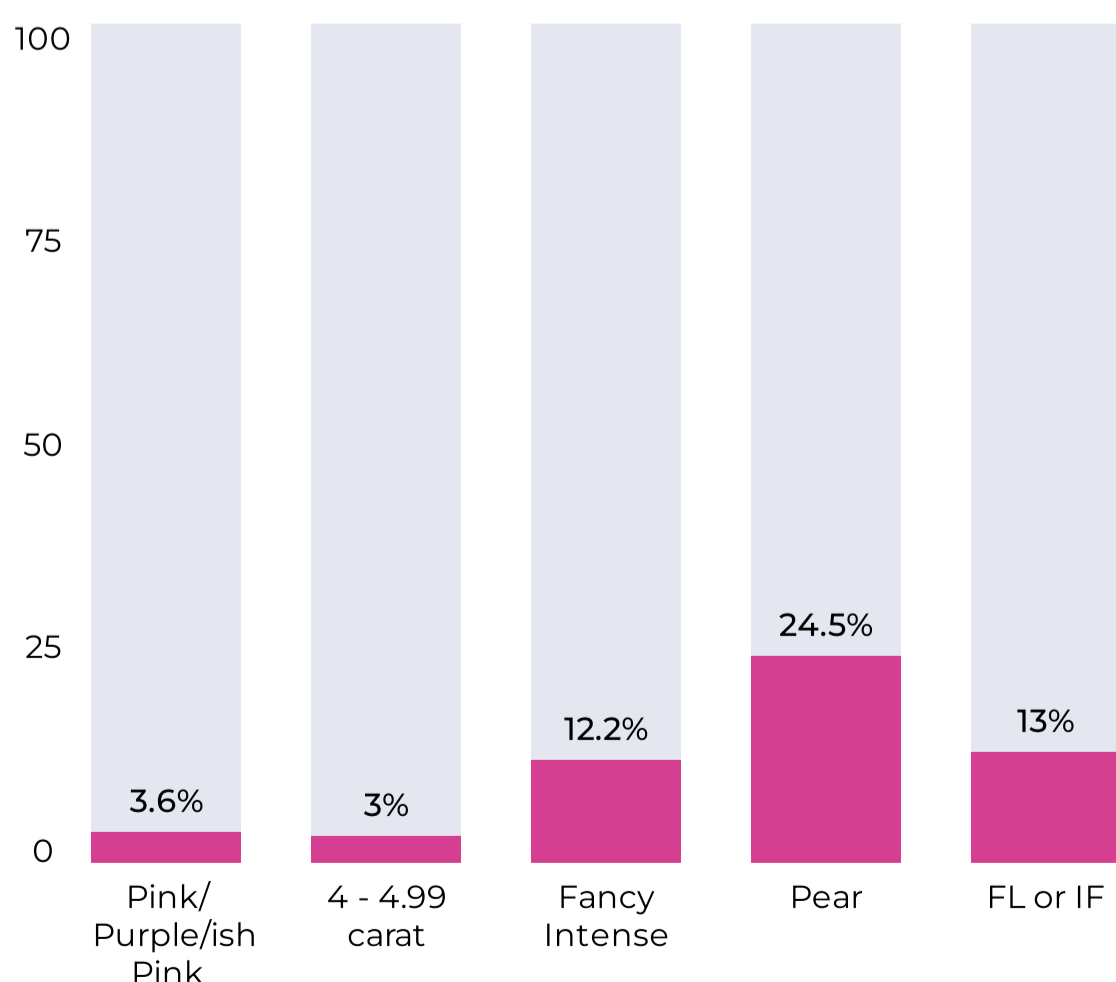

A similar diamond enters the market once every **1 to 2 years**

## **1 In 3,000,000**

Only **1 in ~ 3,000,000** diamonds will have similar characteristics

## GEMOLOGICAL CHARACTERISTICS

Market Distribution Percentage

The pink hue of your Fancy Intense Pink/Purple/ish Pink 4.08 carat diamond is caused by a fascinating geological phenomenon that occurs when certain diamonds undergo more forcible pressure and heat than others. Diamonds that are exposed to 900° Celsius and manage to withstand the immense pressure underground experience a unique change in their atomic alignment. That's when the magic happens! Scientists believe that when light enters your Fancy Intense Pink/Purple/ish Pink Round diamond and crosses its special atomic distortion, the light rays bend at an angle and absorb the green light, creating light waves ranging from red to violet and purple color.
