Fancy Color Diamond appreciation revolves around beauty and rarity. The Rarity Report illustrates the market prevalence of a polished diamond. Whether a diamond is one of several hundred or is introduced to the market once a decade, rarity was, and always will be, a part of the epic story of a fancy color diamond.

Rarity Grade: **Exceptional**

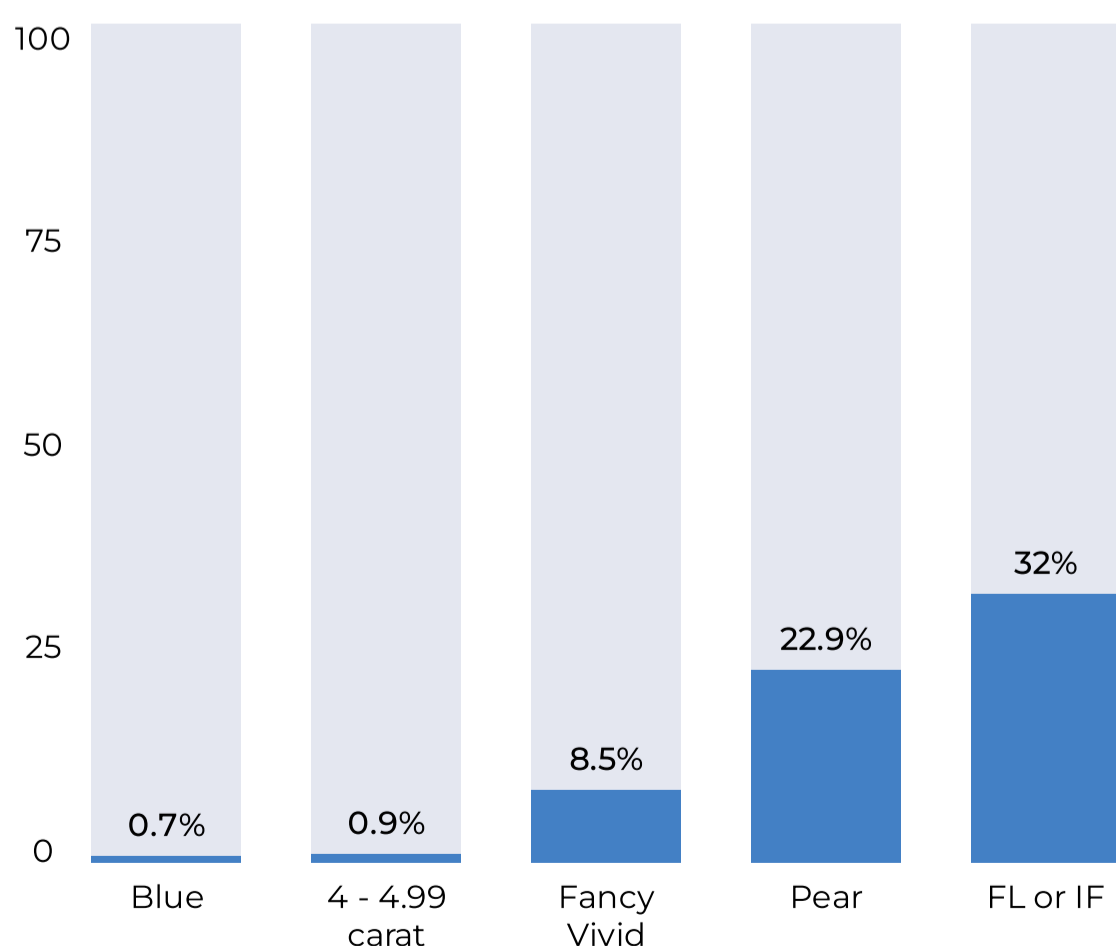

A similar diamond enters the market once **every 25 years or more**

1 In 50,000,000

Only **1 in ~ 50,000,000** diamonds will have similar characteristics

GEMOLOGICAL CHARACTERISTICS

Market Distribution Percentage

The Blue color of your 4.83 carat Round cut diamond emanates from a significant amount of boron that was trapped in the crystal during the formation of the rough diamond. Boron atoms lead to the absorption of yellow, which is at the opposite end of the color spectrum from blue.
